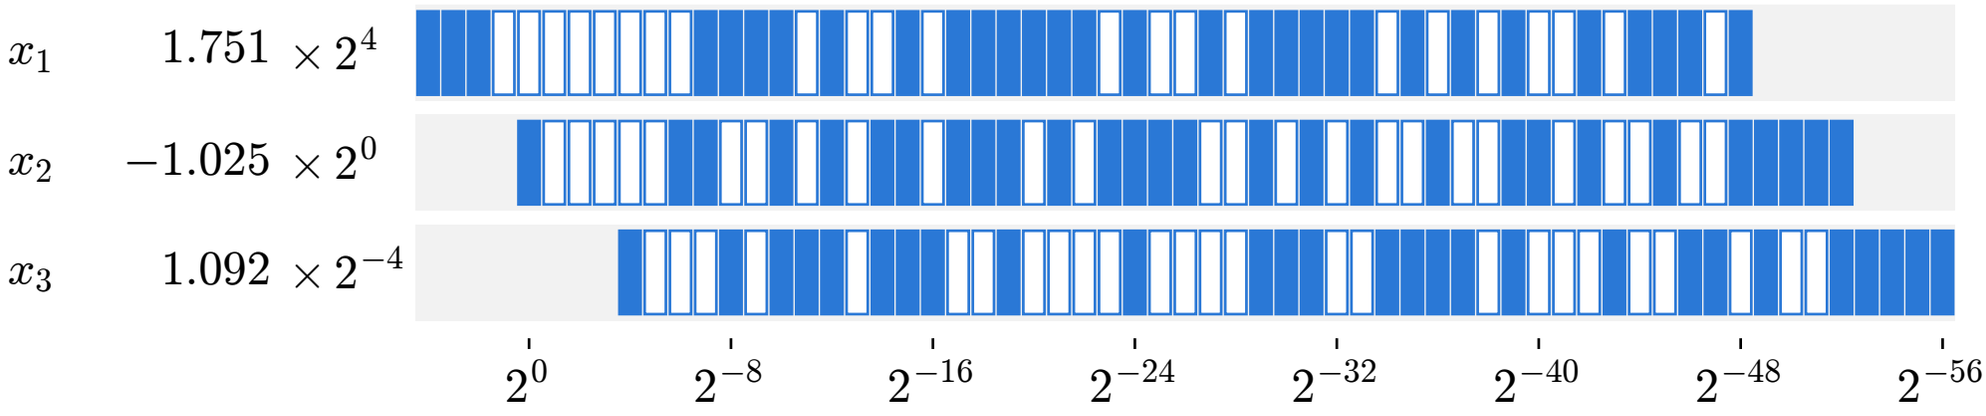
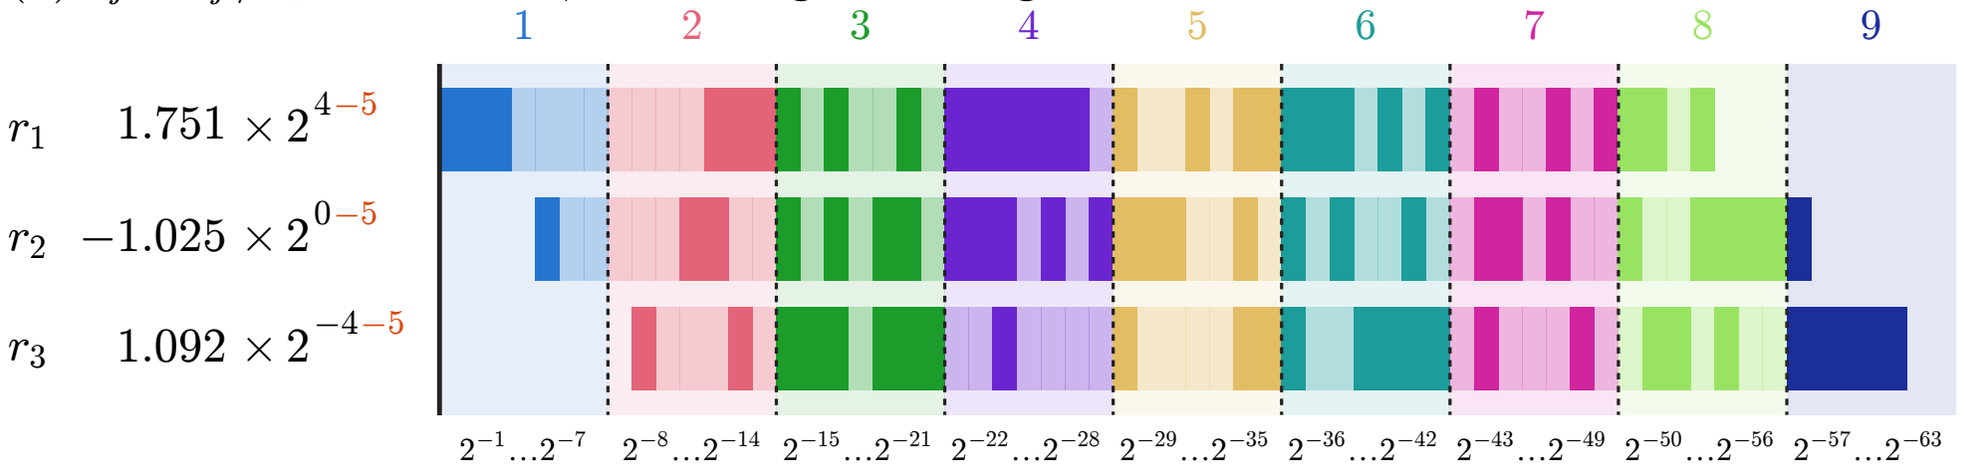
(a) x



(b) $r_j = x_j \,/\, e$, with $e = 2^{5}$, so the largest leading bit lands at 2^{-1}



(c) INT8 slices, slice p weighted 2^{-7p}

$$
\begin{aligned}
&2^{-7}\,[\,2^{5}\;\; 112\;\; -4\;\; 0\,]_{x^{(1)}} + 2^{-14}\,[\,2^{5}\;\; 7\;\; -12\;\; 34\,]_{x^{(2)}} + 2^{-21}\,[\,2^{5}\;\; 82\;\; -86\;\; 119\,]_{x^{(3)}} \\
&+ 2^{-28}\,[\,2^{5}\;\; 126\;\; -117\;\; 16\,]_{x^{(4)}} + 2^{-35}\,[\,2^{5}\;\; 75\;\; -114\;\; 67\,]_{x^{(5)}} + 2^{-42}\,[\,2^{5}\;\; 117\;\; -82\;\; 79\,]_{x^{(6)}} \\
&+ 2^{-49}\,[\,2^{5}\;\; 37\;\; -52\;\; 34\,]_{x^{(7)}} + 2^{-56}\,[\,2^{5}\;\; 104\;\; -79\;\; 52\,]_{x^{(8)}} + 2^{-63}\,[\,2^{5}\;\; 0\;\; -64\;\; 124\,]_{x^{(9)}}
\end{aligned}
$$
